Capstone Features and Timeline

Erika Bond

Description:

I need to work on the data analysis process. I have interviewees, but I need to conduct them. I need to listen to the feedback and apply it to the project.

Projected Timeline:

Next week, I will finish my formal interviews. Then I will edit it and make sure everything gets done. I will take this week to finish up some bugs in my code. I want to get my whole presentation together in week 9 and use week 10 to present.
